

Quick Check 1.1

Multiple Representations of Relationships · Algebra 1 · Unit 1

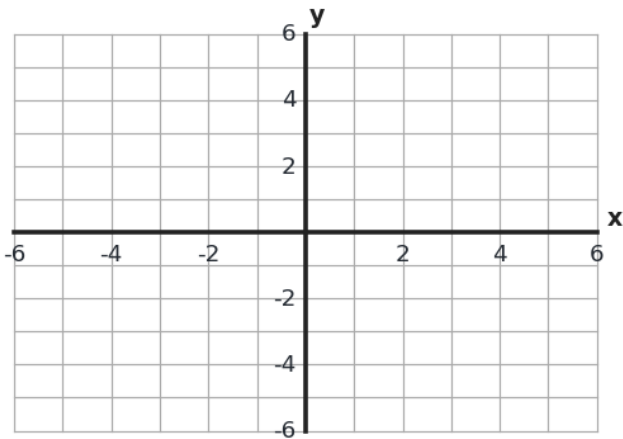

VERSION A

Show enough work to make your thinking clear.

1. Plot an ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

Plot P(-3,4) on the coordinate plane. Label the point.

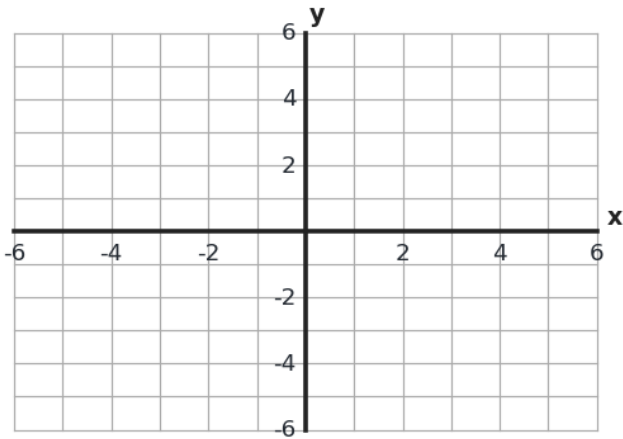

2. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For Q(5,-2), state which axis controls each move. Then plot Q.

First coordinate uses the _____ axis.

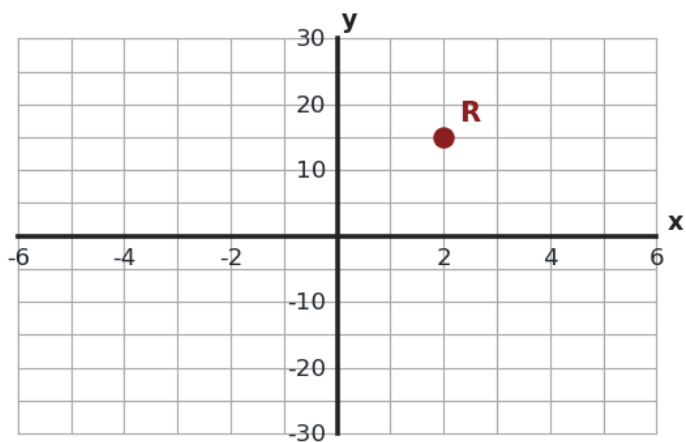

Second coordinate uses the _____ axis.

3. Read the scaled graph.

U1-MG01-IC03 Read a graph using its scale.

The y-axis counts by 5s. Write the coordinates of point R.

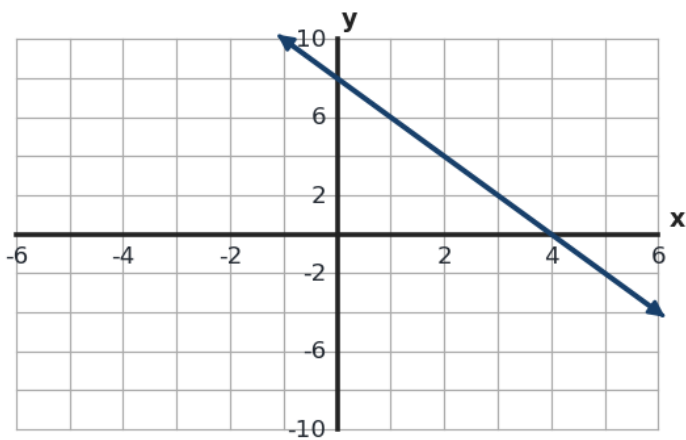

R = (_____ , _____)

4. Identify both intercepts.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

x-intercept: (_____ , _____)

y-intercept: (_____ , _____)

Quick Check 1.1

Multiple Representations of Relationships · Algebra 1 · Unit 1

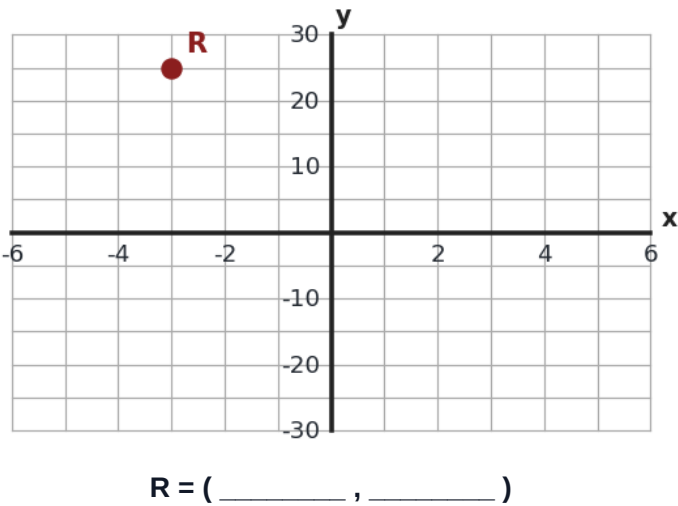

VERSION B

Show enough work to make your thinking clear.

1. Read the scaled graph.

U1-MG01-IC03 Read a graph using its scale.

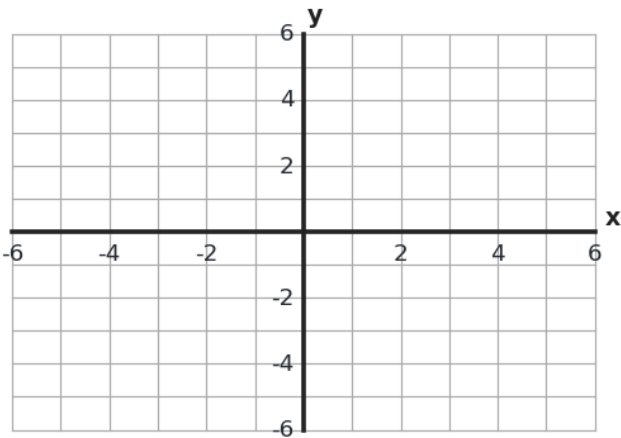

The y-axis counts by 5s. Write the coordinates of point R.

2. Plot an ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

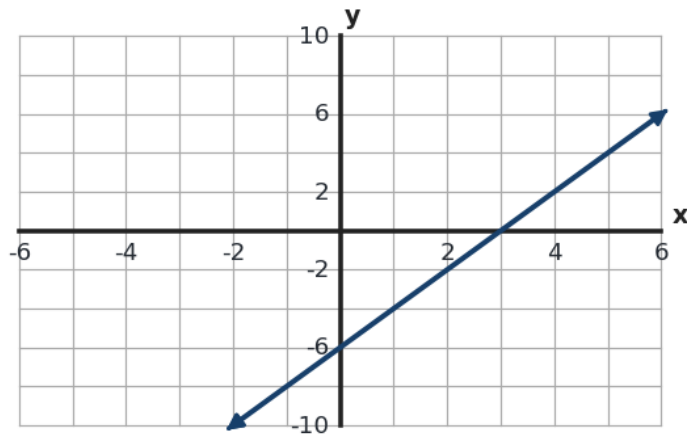

Plot P(4,-3) on the coordinate plane. Label the point.

3. Identify both intercepts.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

x-intercept: (_____ , _____)

y-intercept: (_____ , _____)

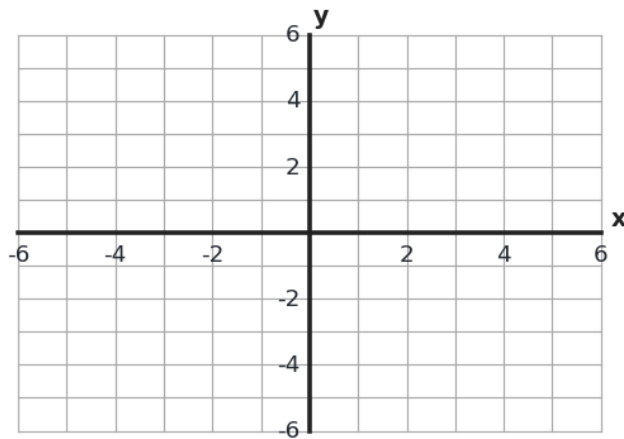

4. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For $Q(-4, 3)$, state which axis controls each move. Then plot Q.

First coordinate uses the _____ axis.

Second coordinate uses the _____ axis.

Name: _____

Date: _____

Multiple Representations of Relationships · Algebra 1 · Unit 1

VERSION C

Show enough work to make your thinking clear.

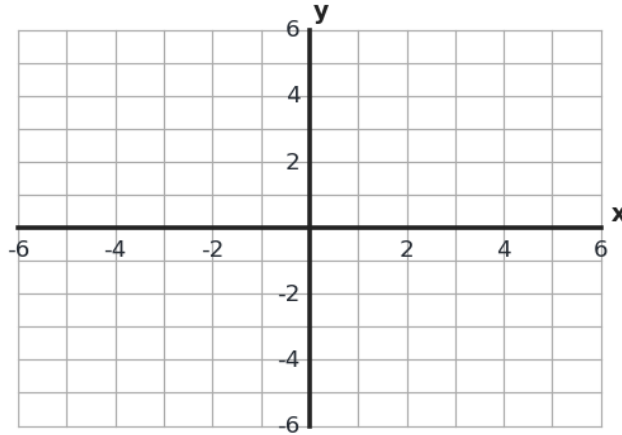

1. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For $Q(2,-5)$, state which axis controls each move. Then plot Q .

First coordinate uses the _____ axis.

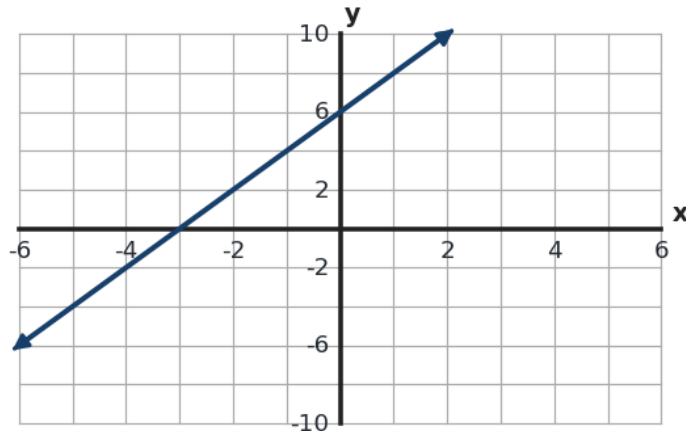

Second coordinate uses the _____ axis.

2. Identify both intercepts.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

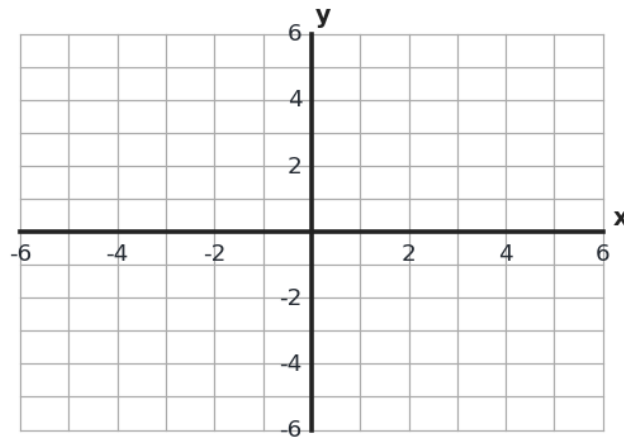

x-intercept: (_____ , _____)

y-intercept: (_____ , _____)

3. Plot an ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

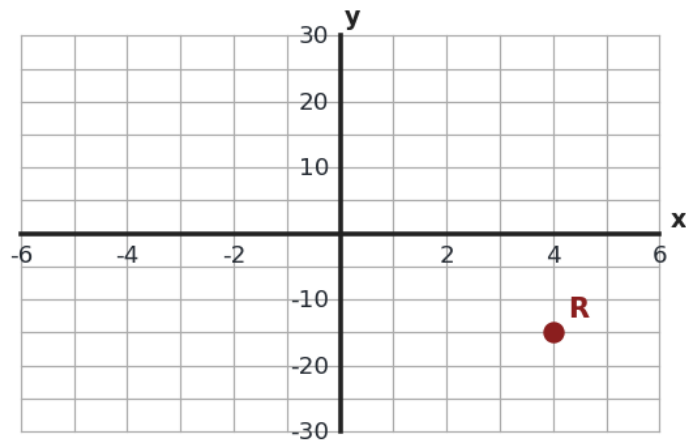

Plot P(-5,-2) on the coordinate plane. Label the point.

4. Read the scaled graph.

U1-MG01-IC03 Read a graph using its scale.

The y-axis counts by 5s. Write the coordinates of point R.

R = (_____ , _____)

Quick Check 1.1

Multiple Representations of Relationships · Algebra 1 · Unit 1

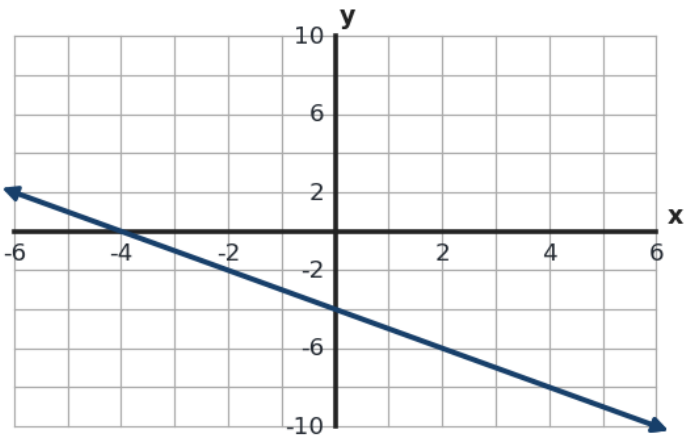

VERSION D

Show enough work to make your thinking clear.

1. Identify both intercepts.

U1-MG01-IC04 Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

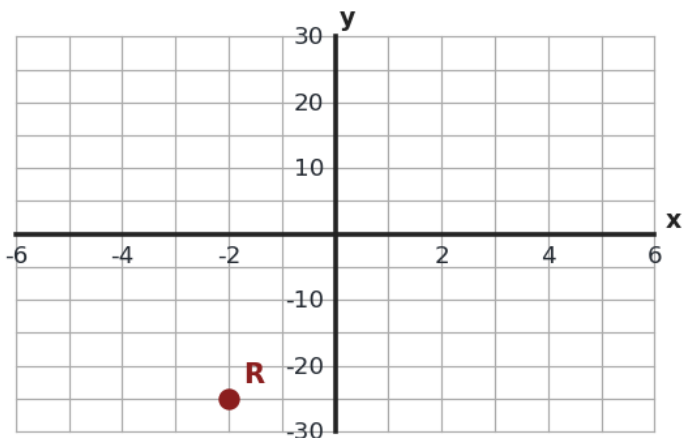

x-intercept: (_____ , _____)

y-intercept: (_____ , _____)

2. Read the scaled graph.

U1-MG01-IC03 Read a graph using its scale.

The y-axis counts by 5s. Write the coordinates of point R.

R = (_____ , _____)

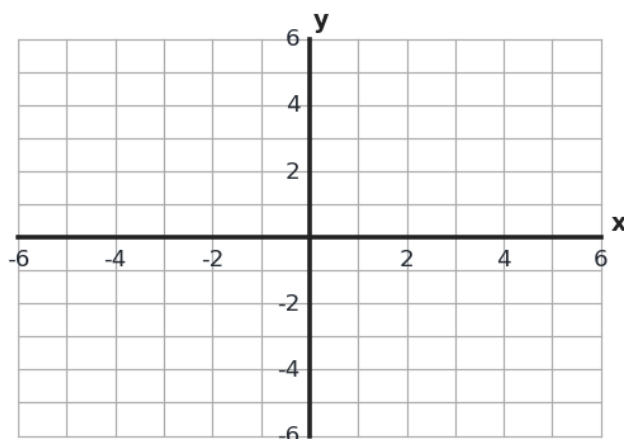

3. Use x first, then y.

U1-MG01-IC02 Use the x- and y-axes correctly.

For $Q(-3,-4)$, state which axis controls each move. Then plot Q .

First coordinate uses the _____ axis.

Second coordinate uses the _____ axis.

4. Plot an ordered pair.

U1-MG01-IC01 Plot and read ordered pairs.

Plot $P(2,5)$ on the coordinate plane. Label the point.
