

Name: _____

Date: _____

Quick Check 1.2

Algebra 1 — Inputs, Outputs, and Functions

Version A

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Substitute and evaluate.

U1-MG03-IC01 — Substitute a value for a variable.

Evaluate $6x + 5$ when $x = -4$.

2. Use the formula.

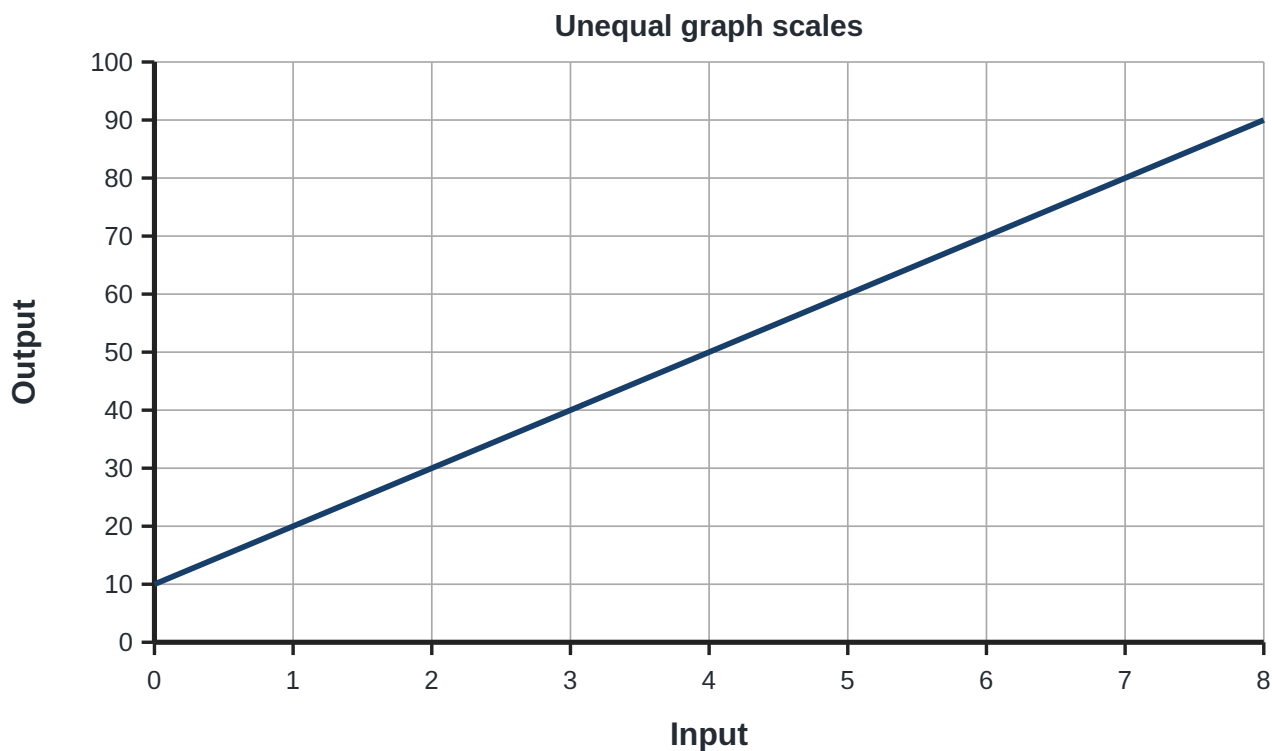

U1-MG03-IC01 — Substitute a value for a variable.

A parking garage uses the formula $C = 3.5h + 6$, where h is the number of hours parked and C is the cost in dollars. Find C when $h = 4$.

3. Read and compare graph values.

U1-MG01-IC03 — Read a graph using its scale.

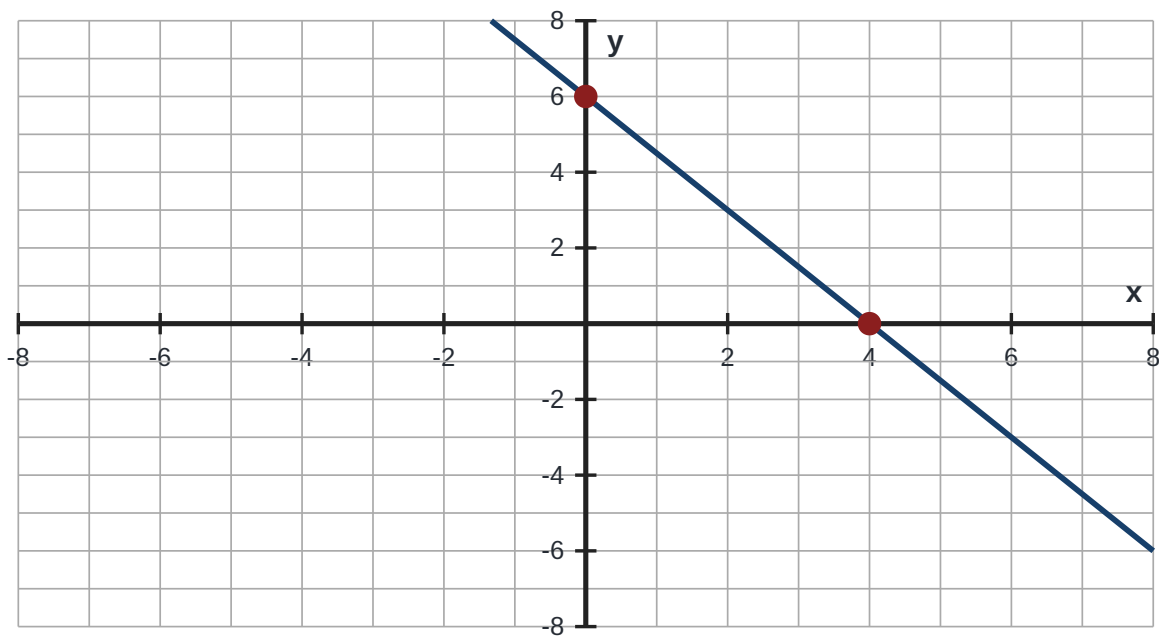

Use the graph. The horizontal and vertical axes use different scales. How much greater is the output at input 7 than at input 2?

4. Identify both intercepts.

U1-MG01-IC04 — Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

x-intercept: _____

y-intercept: _____

Name: _____

Date: _____

Quick Check 1.2

Algebra 1 — Inputs, Outputs, and Functions

Version B

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Use the formula.

U1-MG03-IC01 — Substitute a value for a variable.

A bike rental uses the formula $C = 4h + 9$, where h is the number of hours and C is the total cost in dollars. Find C when $h = 3$.

2. Substitute and evaluate.

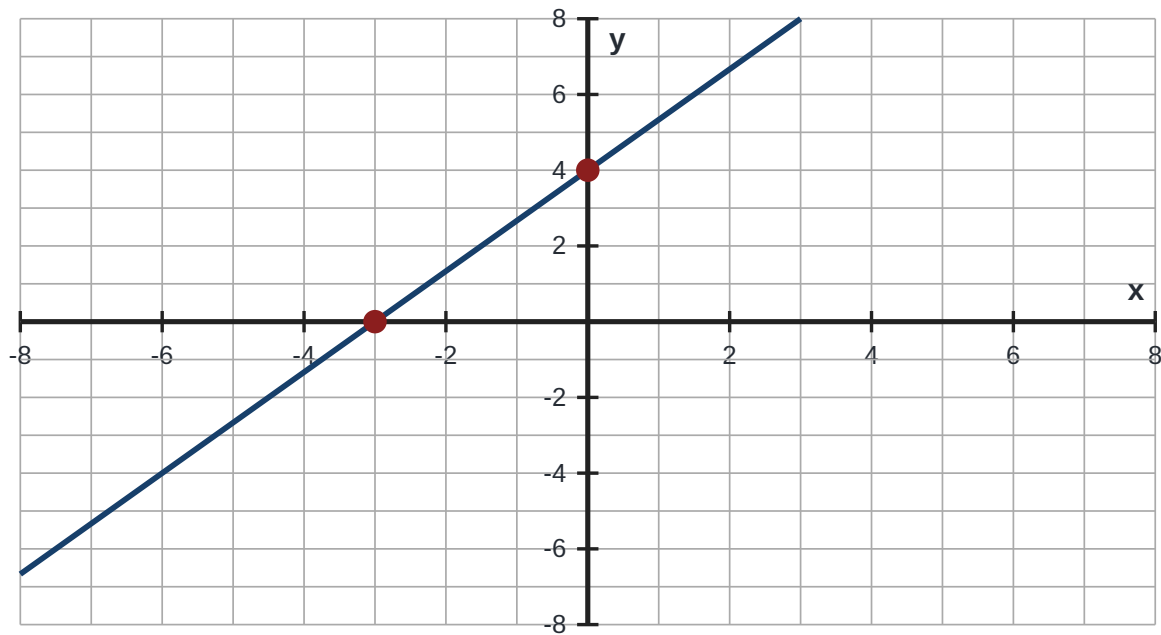

U1-MG03-IC01 — Substitute a value for a variable.

Evaluate $5a - 7$ when $a = -3$.

3. Identify both intercepts.

U1-MG01-IC04 — Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

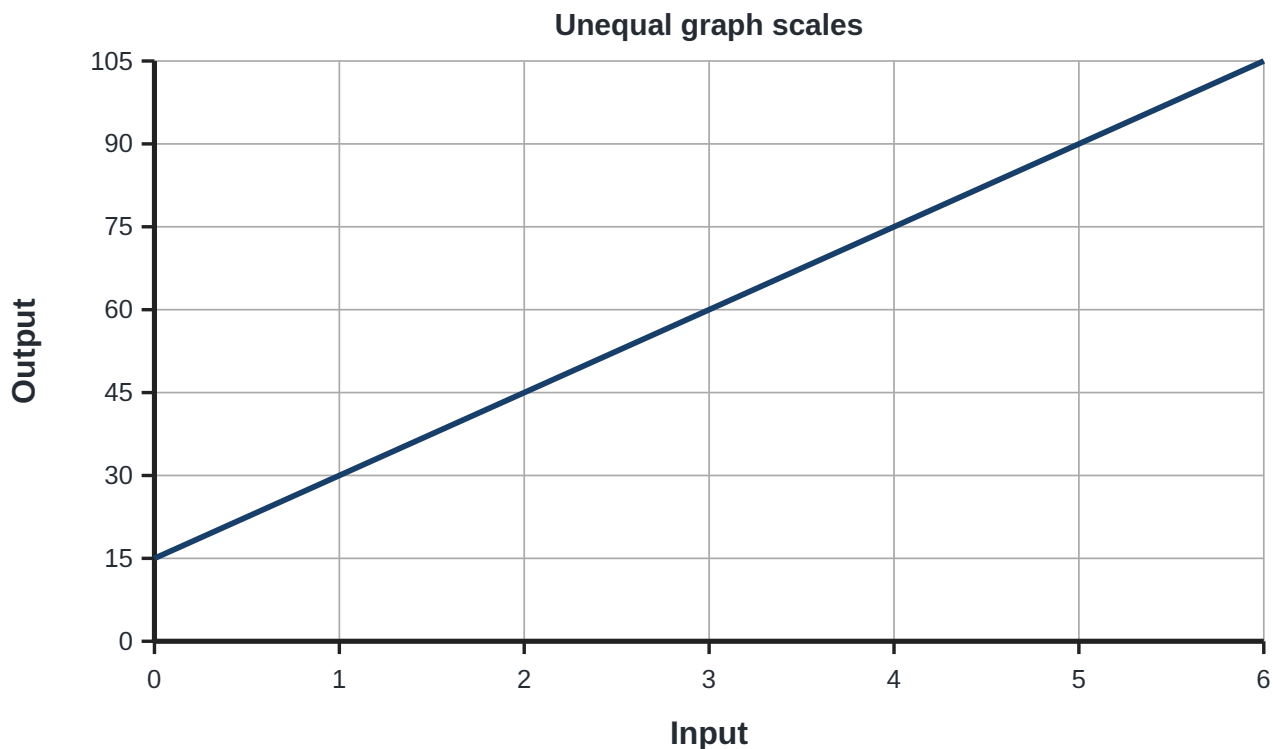

x-intercept: _____

y-intercept: _____

4. Read and compare graph values.

U1-MG01-IC03 — Read a graph using its scale.

Use the graph. The horizontal and vertical axes use different scales. How much greater is the output at input 5 than at input 1?

Name: _____

Date: _____

Quick Check 1.2

Algebra 1 — Inputs, Outputs, and Functions

Version C

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Substitute and evaluate.

U1-MG03-IC01 — Substitute a value for a variable.

Evaluate $4m + 9$ when $m = -5$.

2. Use the formula.

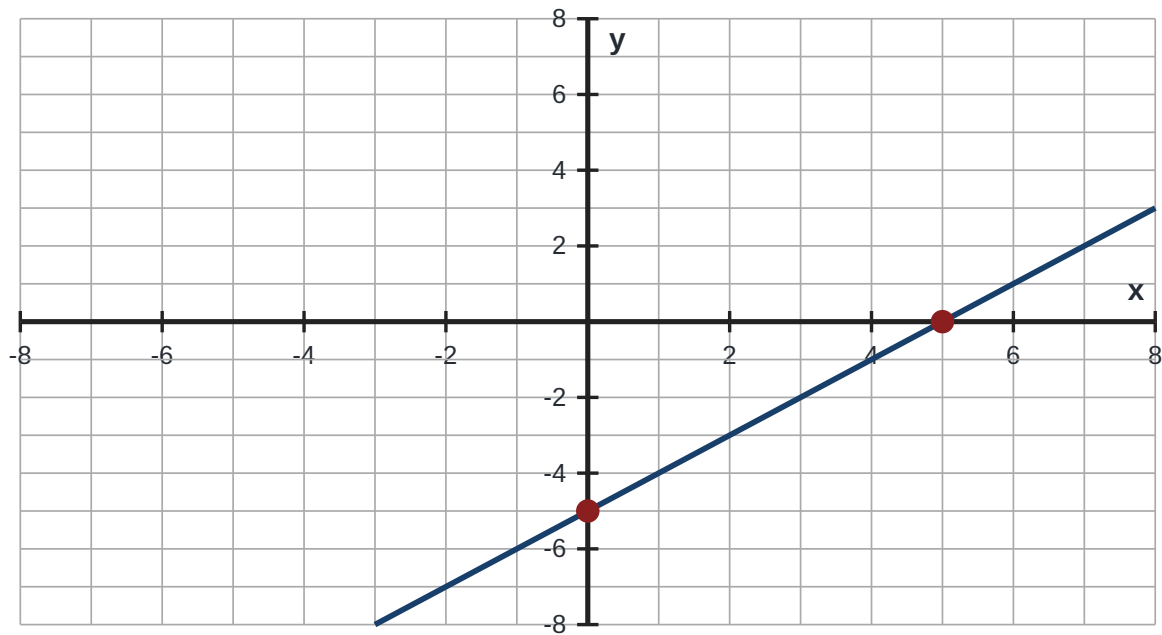

U1-MG03-IC01 — Substitute a value for a variable.

A group ticket order uses the formula $T = 2.5n + 12$, where n is the number of students and T is the total cost in dollars. Find T when $n = 8$.

3. Identify both intercepts.

U1-MG01-IC04 — Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

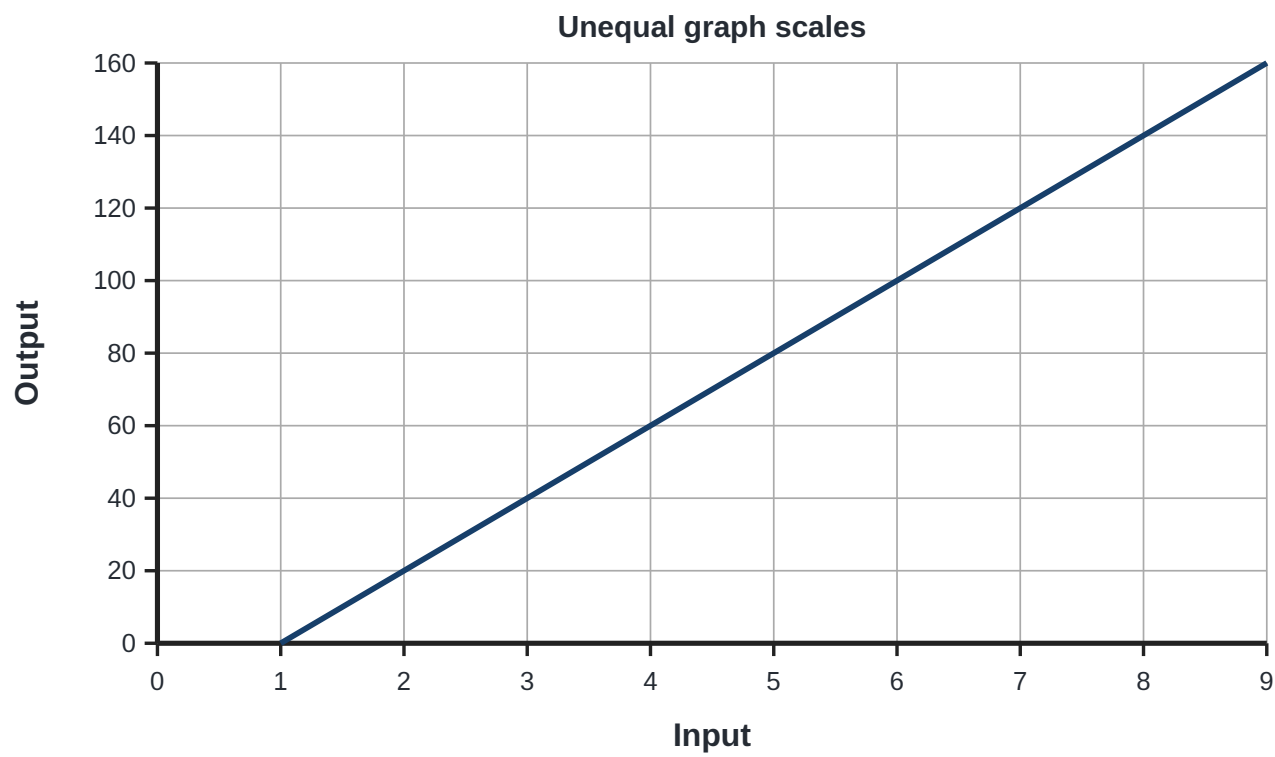

x-intercept: _____

y-intercept: _____

4. Read and compare graph values.

U1-MG01-IC03 — Read a graph using its scale.

Use the graph. The horizontal and vertical axes use different scales. How much greater is the output at input 8 than at input 3?

Name: _____

Date: _____

Quick Check 1.2

Algebra 1 — Inputs, Outputs, and Functions

Version D

Show enough work to make your thinking clear. Write each answer in the space provided.

1. Use the formula.

U1-MG03-IC01 — Substitute a value for a variable.

A printing order uses the formula $P = 1.5n + 7$, where n is the number of posters and P is the total price in dollars. Find P when $n = 10$.

2. Substitute and evaluate.

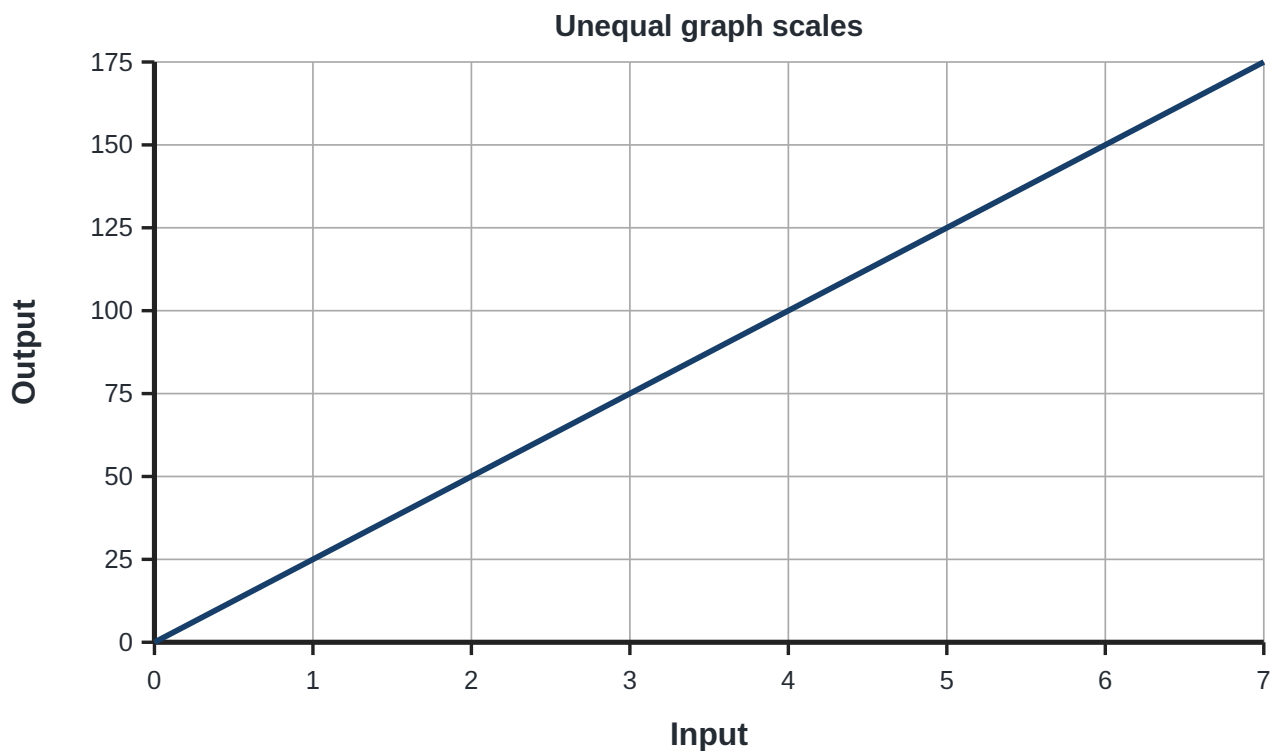

U1-MG03-IC01 — Substitute a value for a variable.

Evaluate $7p - 2$ when $p = -2$.

3. Read and compare graph values.

U1-MG01-IC03 — Read a graph using its scale.

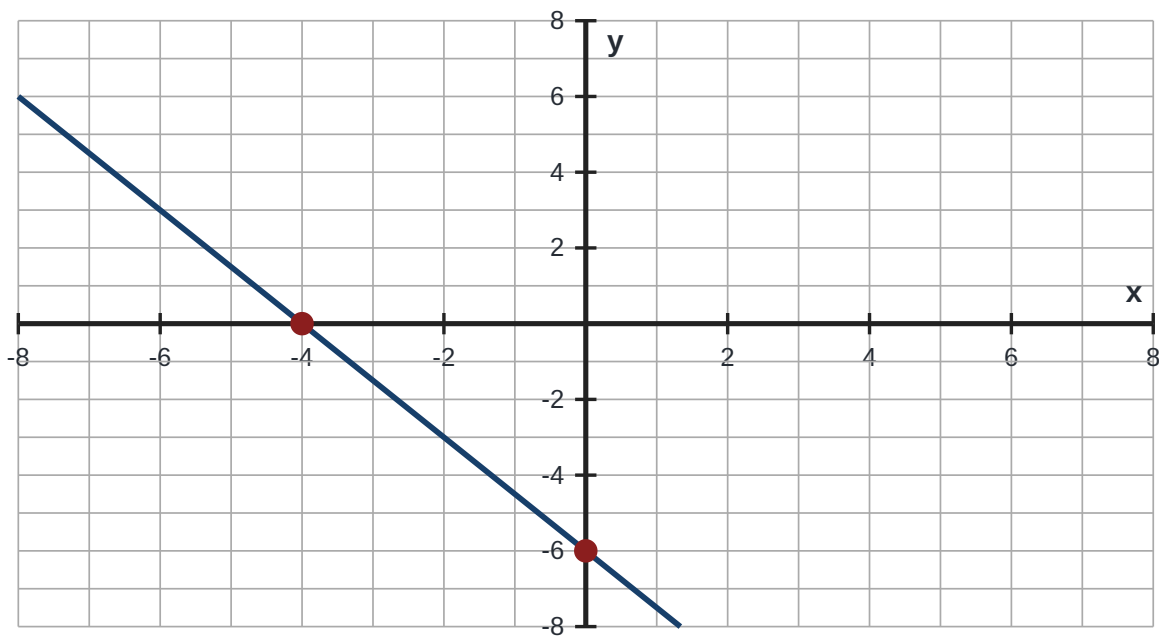

Use the graph. The horizontal and vertical axes use different scales. How much greater is the output at input 6 than at input 2?

4. Identify both intercepts.

U1-MG01-IC04 — Identify and interpret intercepts when they are shown.

Use the graph. Write the x-intercept and y-intercept as ordered pairs.

x-intercept: _____

y-intercept: _____
